

Product datasheet

Mineral water NAŁĘCZOWIANKA, still, 0.75l, deposit

Nałęczowianka still mineral water is drawn from a spring of the same name, located in the Nałęczów spa area, in the buffer zone of the Kazimierz Landscape Park.

Nałęczowianka is a still water ideal for everyday use – it is medium-mineralized and low in sodium.

Its secret lies in the composition of seven minerals that saturate it: calcium (118 mg/l), potassium (3.84 mg/l), magnesium (21.2 mg/l), fluorides (0.27 mg/l), chlorides (14.7 mg/l), sodium (10.9 mg/l), bicarbonates (449 mg/l), total mineralization (675 mg/l).

To preserve the natural composition and microflora of Nałęczowianka, we do not subject our waters to any additional processes other than aeration and filtration.

Capacity: 0,75l

NAŁĘCZOWIANKA

Basic product parameters

PBS reference	SPNA-255266K
Barcode	8445291859548
Product name	Mineral water NAŁĘCZOWIANKA, still, 0.75l, deposit
Category	Water
Tax rate	23%
PKWiU	11.07.11.0
CN	2201 10 11
