

Product datasheet

Protective sunscreen cream DEB Stokoderm Sun Protect 50 Pure, SPF50, tube, 100ml

Water-resistant broad-spectrum protective cream designed for professional protection of the skin against UVA, UVB and UVC radiation, supplied in a convenient tube

Suitable for outdoor workers exposed to solar UVA and UVB radiation and for persons exposed to artificially generated UVC radiation produced during industrial processes such as arc welding

High SPF50 protection factor extends the skin's natural protection time against UVB radiation

Meets European recommendations for protection against harmful UVA radiation

Provides additional protection against UVC radiation generated during certain industrial processes

Water-resistant formula retains SPF50 protection after 80 minutes in water

Non-greasy formulation leaves a pleasant skin feel and helps minimise its effect on handling hand tools

Contains glycerin, which helps prevent the skin from drying out and leaves it feeling smooth after use

Perfume-free and dye-free formula suitable for persons sensitive to such additives

Dermatologically tested; independent testing confirmed that the product does not cause irritation during use

Silicone-free formula does not adversely affect surfaces before the application of paints or surface coatings

Compatible with rubber manufacturing processes; independent testing confirmed that it does not adversely affect the vulcanisation process

Directions for use: apply generously to clean, dry skin 15 minutes before exposure to UV radiation; reapply every 2–3 hours or more frequently after sweating or washing

Applying an insufficient amount of product reduces the level of protection

The product does not provide complete protection against UV radiation and does not replace appropriate personal protective equipment or protective clothing

SPF: 50

Capacity: 100 ml

Fragrance: fragrance-free
