# Universal battery tester DONAU TECH, black

Universal digital battery tester — accurate mAh and voltage readings for AA, AAA, C, D and 9V batteries
Check exactly how much energy remains in each household or workshop battery
This compact digital tester quickly reads the remaining capacity (mAh) and voltage, so you do not have to guess which cells are still suitable for use and which need to be replaced
The battery reading will be displayed on the LCD screen in three areas: the red area indicates bad, the yellow area indicates weak and the blue area indicates good
Support for various battery types: supports D type, C type, AA and AAA batteries, N type, 1.5V button cell, etc.
Wide range of applications: the digital battery capacity indicator can be used to check carbon, zinc, alkaline and rechargeable batteries
ABS, scratch-resistant
Dimensions: 9.2 × 6.3 × 1.4 cm
Supported battery sizes: AA, AAA, C, D, 9V
Compatible with alkaline, lithium, carbon-zinc and nickel-cadmium cells
Voltage range: 0.5 V – 4.5 V
Displayed capacity: mAh
Display: LCD
Housing material: plastic
Weight: lightweight, portable design
How to use: 1. insert a compatible battery into the appropriate slot, and the tester will use the built-in algorithm to calculate the remaining capacity, displayed on the LCD screen in mAh 2. the voltage is visible on the same screen, so you can confirm the condition of the cell and know when it needs to be recharged; the 0.5 V – 4.5 V range covers most cells used in everyday electronic equipment and power tools
Colour: black
